WHAT'S YOUR DOG TELLING YOU?

BY MARTIN MCKENNA

After helping thousands of people improve their dogs' behaviour, Martin 'The Dog Man' McKenna believes the real problem is the same as it's always been - despite centuries of sharing our lives with each other, we humans still can't truly understand or communicate with dogs. The author believes this book will change that.

WHAT'S YOUR DOG TELLING YOU? reveals exactly what your dog is thinking when he jumps up on you when you get home from work (it's not always because he's happy to see you), why he licks you all the time (it's a form of domination), why he sometimes blinks a lot (he's nervous), along with many other dog behaviours. Whatever your dog's age, breed or personality, you'll discover at last why your dog sometimes behaves strangely. Now you'll find out what your dog is trying so desperately to tell you!

LIVING WITH AN OLDER DOG

BY DAVID ALDERTON & DEREK HALL

This book looks at the changes that occur as a dog ages. Most dogs live longer these days, thanks to a greater understanding of what they need in terms of food, exercise, health monitoring, and medical care. This book describes how to recognise and understand the changes – both mental and physical – that occur as your dog ages. It explains – with the help of unique and specially-commissioned photography – how to manage these changes successfully, and thus how to make the senior canine years more enjoyable and fulfilling for both you and your dog.

Exercise, diet, grooming, sharing the house with a younger dog, travel and holiday arrangements – all this and much more is covered in detail. There is also advice on how to work closely with your vet in order to manage your dog's senior years, as well as sympathetic advice for when the time comes to say goodbye.

THE INVISIBLE LINK TO YOUR DOG

A NEW WAY OF ACHIEVING HARMONY BETWEEN DOGS AND HUMANS
BY ANGIE MIENK

When is a whisper better than shouting? When you're wanting to get the best from your dog. The times when dogs were trained to be only obedient or to carry out certain tasks are long gone, with most dog owners today wanting a relationship based on mutual understanding and a much closer bond to their four-legged friend. This book presents a unique method that will help readers develop non-verbal, almost intuitive communication with their dogs. Most commands are made using the voice, but this book explains how to train a dog to understand its human companion's wishes by interpreting nonverbal signals. There are many practical examples of ways to develop a link between pet and owner that is based on harmony and mutual understanding.
